

Out here, change is quiet.

A remote reading can help someone decide what needs a closer look.

Environmental monitoring teams

Which change needs attention?

Define which thresholds matter and how quickly the team needs to know.

Environmental monitoring teams

Send the part that matters.

Design a small, useful exception message and retain detail locally where appropriate.

Environmental monitoring teams

Remote still has limits.

Plan for power and sky view; a satellite path cannot guarantee delivery.

Environmental monitoring teams

Keep going →

Bring the site into the design.

Use the readiness guide to map the site, payload and reporting priorities.
