# The route just changed.

For the person waiting at the next handover, the next update matters.

**Asset tracking and logistics teams**

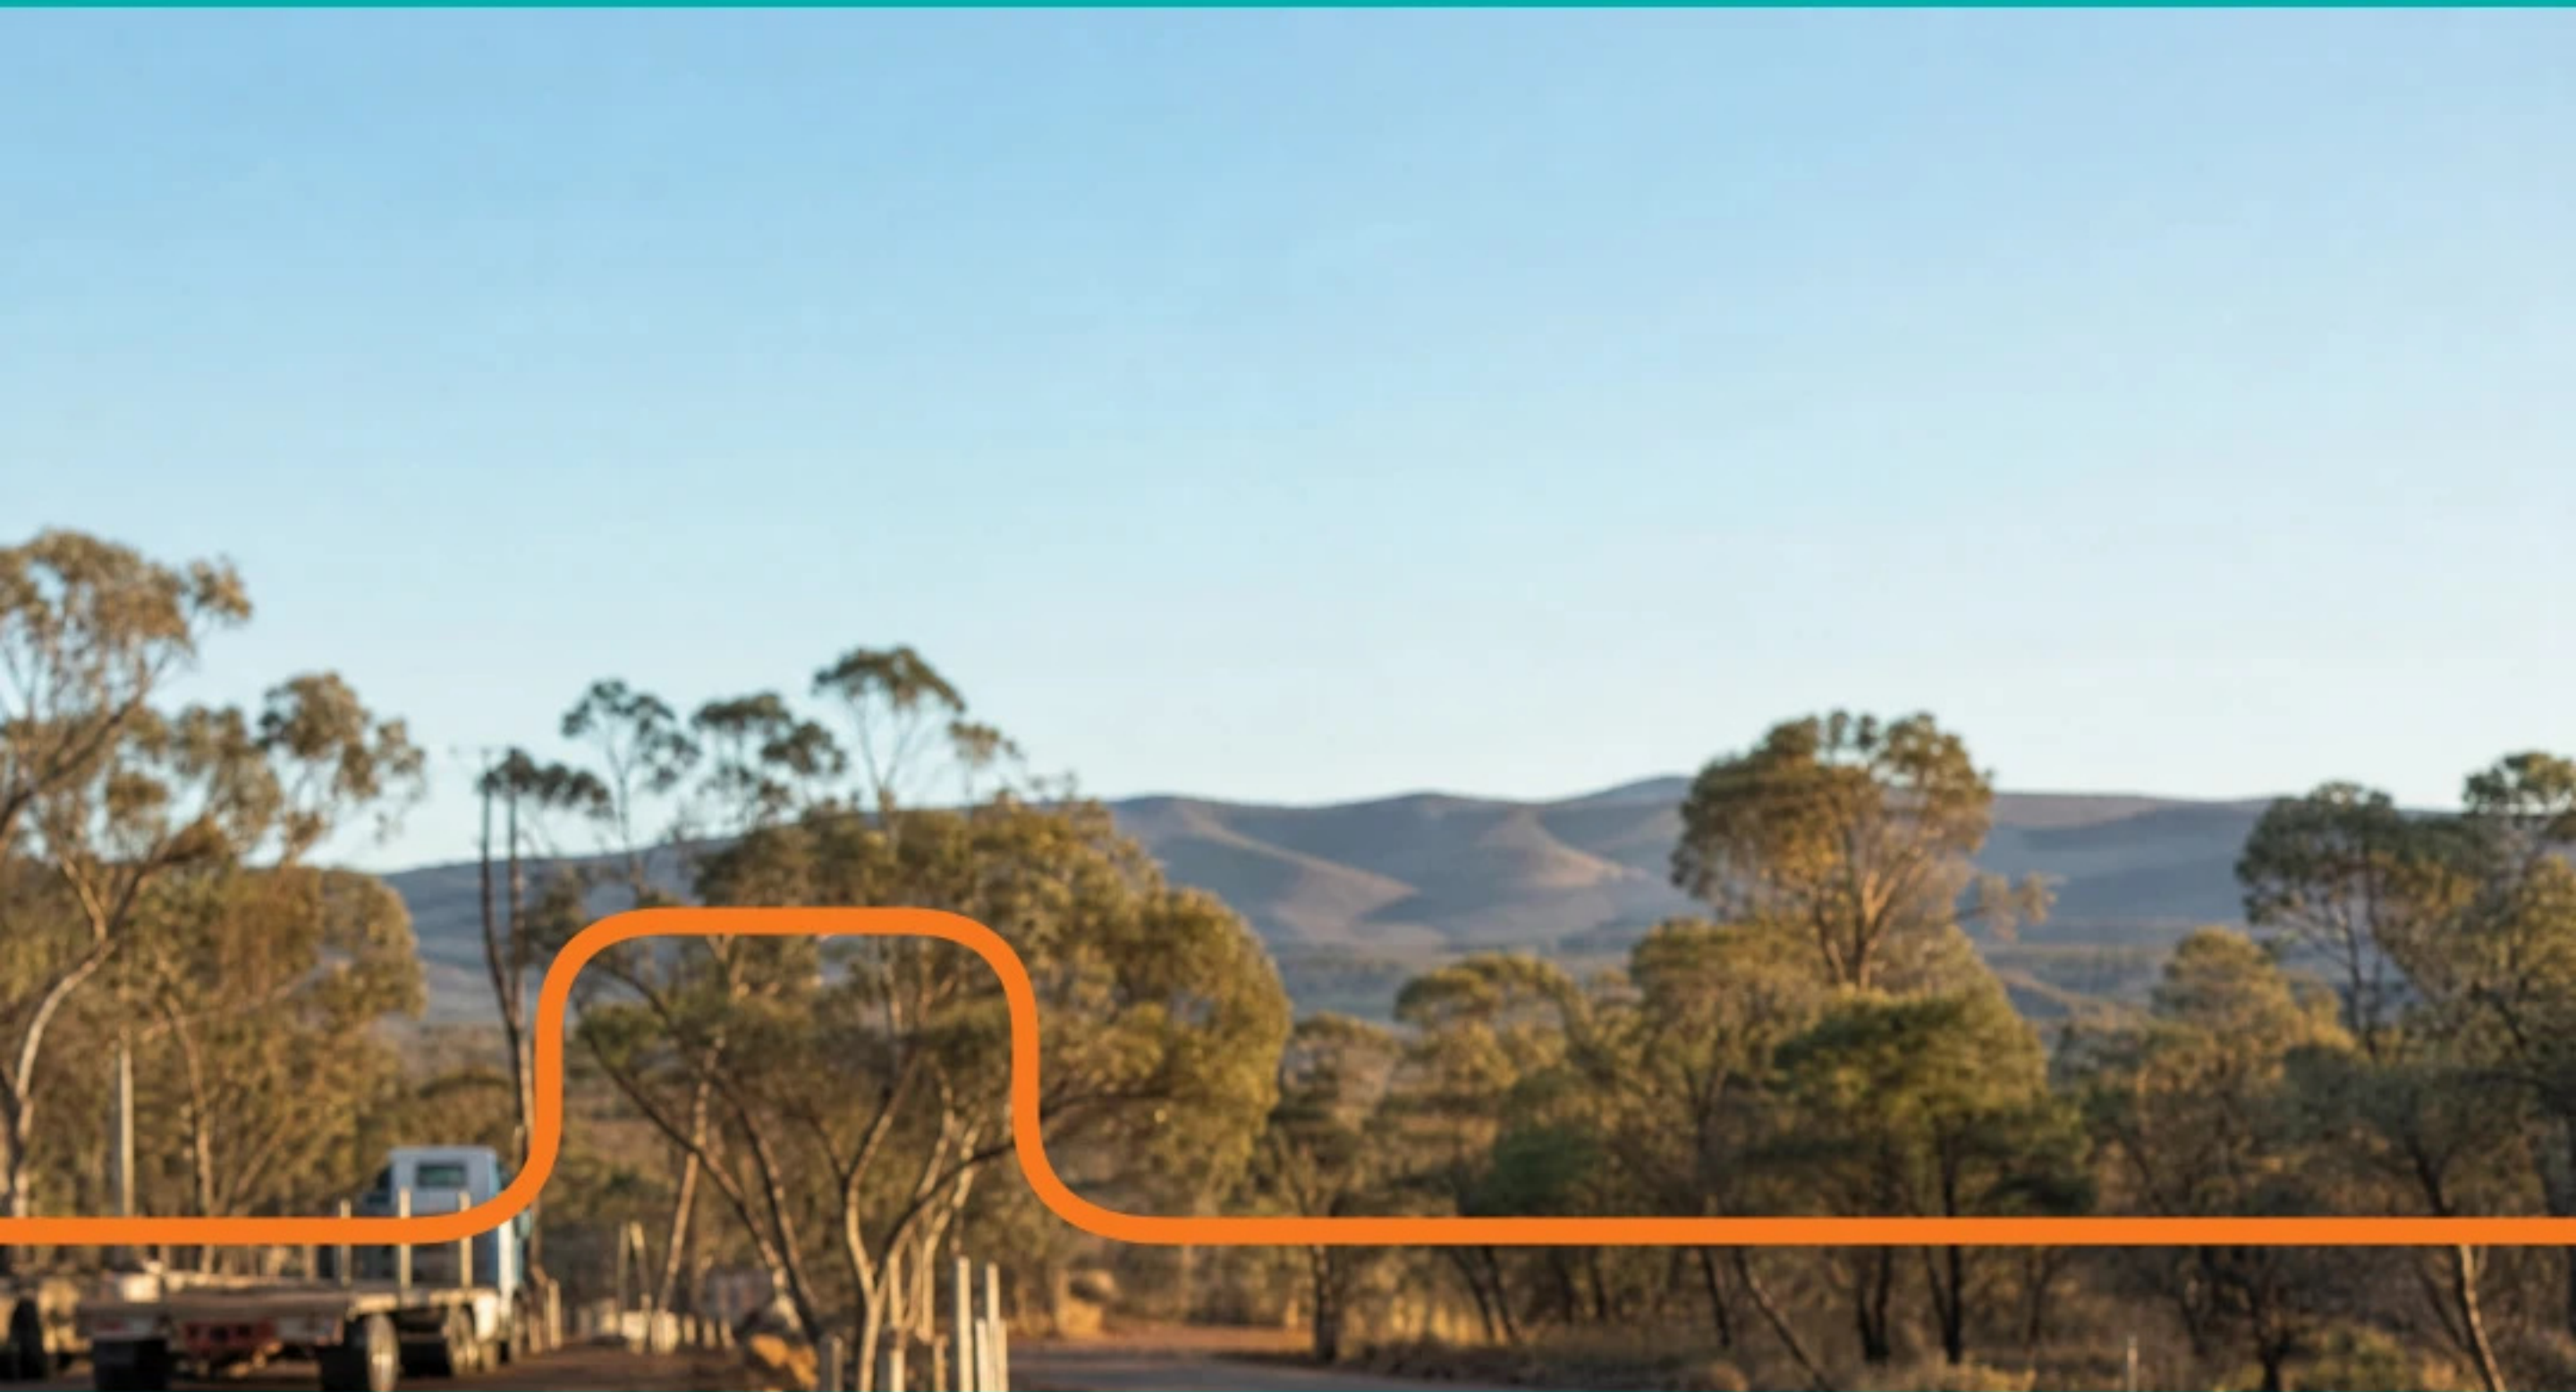

M2M Connectivity + M2M One · Hybrid IoT

# So did the coverage.

A detour can take a tracker beyond the cellular conditions it was designed around.

# Which update cannot wait?

Rank the location, delay and exception messages that change a human decision.

# Give the exception a plan.

Design cellular retries, a satellite message path and what happens when neither is available.

**Asset tracking and logistics teams**
