

HYBRID IOT · ASSET TRACKING AND LOGISTICS TEAMS

Where does the route exceed your network assumption?

Detours, depots and remote handover points can expose a coverage dependency.

HYBRID IOT · ASSET TRACKING AND LOGISTICS TEAMS

Rank the events

Routine location updates, exceptions, tamper events and safety alerts do not carry equal urgency.

Asset tracking beyond the predictable route

Swipe →

HYBRID IOT · ASSET TRACKING AND LOGISTICS TEAMS

Define the behaviour

Set cellular retry, satellite escalation, payload size, acknowledgement and store-and-forward rules.

Asset tracking beyond the predictable route

Swipe →

HYBRID IOT · ASSET TRACKING AND LOGISTICS TEAMS

Design the whole device

Power, antennas, enclosure, firmware, service costs and operations must be reviewed together.

HYBRID IOT · ASSET TRACKING AND LOGISTICS TEAMS

Assess the coverage gap

Bring a real route and message profile to a scoped Hybrid IoT design conversation.
