

HYBRID IOT · LONE-WORKER AND SAFETY-SOLUTION TEAMS

Connectivity is one safety layer

Treat it as part of a governed process—not a guarantee.

HYBRID IOT · LONE-WORKER AND SAFETY-SOLUTION TEAMS

Define acknowledgement

Know how the device, worker and response team
see message state.

HYBRID IOT · LONE-WORKER AND SAFETY-SOLUTION TEAMS

Define escalation

Set retry, alternate path and human escalation behaviour for each event class.

HYBRID IOT · LONE-WORKER AND SAFETY-SOLUTION TEAMS

Define the unavailable state

The product and procedure must make
communication limits visible.

HYBRID IOT · LONE-WORKER AND SAFETY-SOLUTION TEAMS

Assess the dependency

Review the complete safety workflow with technical and risk owners.
